Philosophy Statement on Educational Outcome Assessment

Case Western Reserve University is committed to maintaining a comprehensive educational outcome assessment program. This program measures how our students have changed, what knowledge they have gained, and what competencies they have developed. Using these measures, we not only assess how well we are achieving our objectives, but also identify what types of programs and experiences have the most powerful impacts. Our ultimate goal is to incorporate ongoing evaluations into our educational culture to ensure we continually improve our programs and enhance the distinctiveness of our university.

Education outcome assessments are based on the core vision and mission of each school and the university as a whole. The faculty, empowered by adequate resources and support to carry out assessment activities, accepts that educational outcome assessments are a part of their academic duties. These assessments serve as a means by which faculty can improve teaching and learning, and also provide evidence of teaching effectiveness for institutional purposes.
