## ASTRONOMY, BA

Degree: Bachelor of Arts (BA)
Major: Astronomy

## Program Overview

The BA in Astronomy provides a theoretical foundation and practical experience in the field of astronomy. The program offers flexible coursework in astronomy, math, and physics that helps to facilitate double or secondary majors. Students develop skills in data analysis, computational methods, and science communication. This program prepares students for study in astronomy at the graduate level. The program is also good preparation for careers in data science, science education, public outreach, and related fields.

## Undergraduate Policies

For undergraduate policies and procedures, please review the Undergraduate Academics section of the General Bulletin.

## Accelerated Master's Programs

Undergraduate students may participate in accelerated programs toward graduate or professional degrees. For more information and details of the policies and procedures related to accelerated studies, please visit the Undergraduate Academics section of the General Bulletin.

## Program Requirements

Students seeking to complete this major and degree program must meet the general requirements for bachelor's degrees and the Unified General Education Requirements. Students completing this program as a secondary major while completing another undergraduate degree program do not need to satisfy the school-specific requirements associated with this major.

The Bachelor of Arts in Astronomy requires 120 credit hours, including 15 credit hours in astronomy, 26 credit hours in physics, 14 credit hours in math, 3 credit hours in computer programming, and 9 credit hours in technical electives.

## a Unified General Education Requirement.

b A Capstone Experience is required of all students. The Astronomy BA does not require the Astronomy Capstone but only that 3 credit hours of Capstone be taken in some field. Depending on
the Capstone taken, the 3 credit hours may be spread over two semesters.
