FURTHER, AT LEAST 15 CREDIT HOURS MUST BE IN COURSES OFFERED BY THE BIOLOGY PROGRAM.

At least 18 of these credit hours must be at the 400-level or above.

All candidates must complete a total of 30 credit hours in coursework at the 300-level or higher within 5 years of matriculation into the graduate program.

At least 18 of these credit hours must be at the 400-level or above.

Candidates are limited to 3 credit hours of BIOL 601, but may take up to 9 credit hours of BIOL 651.

According to rules of the School of Graduate Studies, once a candidate registers for BIOL 651, the registration must continue for a minimum of 1 credit hour per semester until completion of the degree program.

Students who are uncertain about completing requirements for a Plan A Master of Science degree should consult the regulations for the Plan B Master of Science degree. These two master’s degrees have different regulations concerning use of BIOL 601. A candidate may wish to use BIOL 599; the letter grade assigned will reflect the evaluation by the entire Advisory Committee.

Plan A (Thesis) Entrepreneurial Biotechnology

The Entrepreneurial Biotechnology Program (EB) requires students to write a thesis in order to graduate with a Master of Science in Biology, Entrepreneurship Track. The thesis must be based on a project of significant time investment on the part of the student and must be grounded in the real world (i.e., not simply an academic exercise). Thus, each student is required to work as an intern, employee, or entrepreneur, typically with a start-up, existing company, early-stage investment firm, or affiliate of a research organization. The duration must be at least one year, with one semester reserved for full-time work outside of the classroom (usually the fourth and final semester). Under this requirement, international students will be permitted no more than one semester of full-time curricular practical training (CPT).

Plan B (Non-thesis)

All candidates must complete a total of 30 credit hours in coursework at the 300-level or higher.

At least 18 of these credit hours must be at the 400-levels or above. Further, at least 15 credit hours must be in courses offered by the Biology Department. At least one course must be taken in each of the following areas of biology: cell and molecular biology (including chemical biology), organismal biology, and population biology. The remaining course work may include courses offered by any department within the University, subject to an advisor’s approval and School of Graduate Studies regulations.

Candidates are limited to a total of 6 credit hours of independent study (up to 3 credit hours of BIOL 599 and up to 3 credit hours of BIOL 601). BIOL 599 requires completion of a Course Proposal Form (available in the Biology Departmental Office) and approval by the advisor. In the case of enrollment in BIOL 599, the letter grade assigned will reflect the evaluation by a two-person committee recruited by the student and advisor.
