**More Information:** <https://artsci.case.edu/hpst/>

**Degree:** Bachelor of Arts (BA)  
**Major:** History and Philosophy of Science

## Program Overview

The Department of Philosophy and the Department of History together offer an undergraduate major in the history and philosophy of science. The purpose of the major is to develop a humanistic understanding of the nature and development of science through the combined use of philosophical and historical methods. The major provides a foundation for graduate study in a range of academic disciplines and for careers in such areas as business, medicine, law, public policy, and science journalism. It also may be profitably combined with a program in one of the sciences. Within the major, a student may choose an emphasis on the philosophy of science, the history of the physical sciences, or the history of the biological and medically related sciences.

## Learning Outcomes

- Students will be able to demonstrate basic knowledge regarding the history of science, including appropriate technical vocabulary, and apply ideas from this history to contemporary problems.
- Students will be able to distinguish between the aspects of a debate that can be resolved through the empirical inquiry and those that require an appeal to ethical principles, values, or metaphysical claims.
- Students will be able to interpret, contextualize, and evaluate complex philosophical texts in oral and written presentation.
- Students will be able to articulate personal beliefs about the nature of knowledge, reality, and the good, and critically evaluate those beliefs from alternate standpoints.
- Students will be able to present persuasive written arguments for a controversial point of view, identify the assumptions underlying such arguments, and articulate potential opposing arguments.

## Undergraduate Policies

For undergraduate policies and procedures, please review the Undergraduate Academics section of the General Bulletin.

## Accelerated Master's Programs

Undergraduate students may participate in accelerated programs toward graduate or professional degrees. For more information and details of the policies and procedures related to accelerated studies, please visit the Undergraduate Academics section of the General Bulletin.

## Department Faculty

Chris Haufe, PhD  
*Elizabeth M. and William C. Treuhaft Professor of the Humanities and Chair, Department of Philosophy*

Colin McLarty, PhD  
*Truman P. Handy Professor of Philosophy*

Aviva Rothman, PhD  
*Assistant Professor, Department of History*

Jonathan Sadowsky, PhD  
*Theodore J. Castele Professor and Chair, Department of History*

## Program Requirements

Students seeking to complete this major and degree program must meet the general requirements for bachelor's degrees and the Unified General Education Requirements. Students completing this program as a secondary major while completing another undergraduate degree program do not need to satisfy the school-specific requirements associated with this major.

The history and philosophy of science major requires 30 credit hours from courses in philosophy and in history of science and technology:

Code	Title	Credit Hours
Any four of the following classes:		12
PHIL 101	Introduction to Philosophy	
HSTY 201	Science in Western Thought I	
HSTY 202	Science in Western Thought II	
HSTY/PHIL 203	Revolutions in Science	
PHIL 204/ HSTY 207	Philosophy of Science	
PHIL 302	Modern Philosophy	
Five electives approved by the major advisor		15
<b>Total Credit Hours</b>		<b>27</b>

Students who major in the history and philosophy of science are not permitted to take a second major in philosophy or to minor in philosophy.
