

SYSTEMS AND CONTROL ENGINEERING, MINOR

Program Overview

The systems and control engineering minor equips students with fundamental skills in systems analysis (including systems thinking, optimization, simulation, economic and financial analysis, etc.), control, signal processing, operations, production, and manufacturing systems.

Undergraduate Policies

For undergraduate policies and procedures, please review the Undergraduate Academics section of the General Bulletin.

Program Requirements

A total of 16 credit hours are required to obtain a minor in systems and control engineering.
