

PUBLIC HEALTH, GRADUATE CERTIFICATE

Credential: Graduate Certificate

Field of Study: Public Health

The Certificate Program in Public Health provides public health practitioners and professionals with graduate-level training through 15 credit hours of coursework in the CWRU MPH Program. Formal training includes epidemiology, statistics, health behavior, health policy and management. An elective or practicum provides specialized skills to each trainee. The certificate program is designed to support professional development, leadership, and advancement among the public health workforce in our communities and region.
