

# READINESS INSTRUCTION FOR BIOMEDICAL EDUCATION (PRIME), POST-BACCALAUREATE CERTIFICATE

Phone: 216.368.5296

Anthony Saar, MEd, Director, PRIME Program  
prime@case.edu

**More Information:** <https://case.edu/medicine/prime>

**Credential:** Post-Baccalaureate Certificate

**Field of Study:** Readiness Instruction for Biomedical Education

## Program Overview

PRIME is a post-baccalaureate certificate (non-degree) program for students who need additional preparation to have a competitive application for MD or DO programs.

**This program is designed for two types of students:**

- Career changers - students who have not yet completed all their pre-med requirements.
- Academic enhancers - students who need to improve their undergraduate GPA and their foundation in key pre-med content.

**Key features of this program include:**

- A highly flexible and individually tailored program of study providing each student the preparation that they need to be competitive applicants
- A dedicated program director who has experience advising for medical school admissions and who meets regularly with students one-on-one
- Problem-based Clinical Inquiry (IQ) coursework designed to give students exposure to medical terminology and clinical reasoning and develop professional growth via self-reflection
- Specialized Medical College Admissions Test (MCAT) preparatory course designed to comprehensively review all MCAT content areas, as well as testing methods.
- Diverse opportunities for shadowing, volunteering, and research in affiliation with 4 world-class health systems (The Cleveland Clinic, University Hospitals Cleveland Medical Center, VA Medical Center, and MetroHealth Medical Center)
- Opportunity to interview with the CWRU School of Medicine for select students

## Graduate Policies

For graduate policies and procedures, please review the School of Graduate Studies section of the General Bulletin.

## Program Requirements

The PRIME program is highly flexible. To earn the certificate, students must complete at least 24 credit hours. A program of study must be approved by the program director. Each student will work closely with the program director to tailor the program to their needs. Based on previous coursework taken, some students may need to take more than 24 credit hours to complete the prerequisite courses for medical school and earn the PRIME certificate. This program can be completed in 1-2 years, depending on a student's individual needs.

### Required Program Coursework:

Code	Title	Credit Hours
MGRD 310	Introduction to Clinical Inquiry (IQ)	3
MGRD 311	Introduction to Clinical Inquiry (IQ) II	3

### Required Medical School Coursework:

Code	Title	Credit Hours
BIOC 307	Introduction to Biochemistry: From Molecules To Medical Science	4
BIOL 214	Genes, Evolution and Ecology	3
BIOL 214L	Genes, Evolution and Ecology Lab	1
BIOL 215	Cells and Proteins	3
BIOL 215L	Cells and Proteins Laboratory	1
or BIOL 216	Development and Physiology	
BIOL 216L	Development and Physiology Lab	1
CHEM 105	Principles of Chemistry I	3
CHEM 106	Principles of Chemistry II	3
CHEM 113	Principles of Chemistry Laboratory	2
CHEM 223	Introductory Organic Chemistry I	3
CHEM 224	Introductory Organic Chemistry II	3
CHEM 233	Introductory Organic Chemistry Laboratory I	2
CHEM 234	Introductory Organic Chemistry Laboratory II	2
MATH 125	Math and Calculus Applications for Life, Managerial, and Social Sci I	4
MATH 126	Math and Calculus Applications for Life, Managerial, and Social Sci II	4
or STAT 201	Basic Statistics for Social and Life Sciences	
PHYS 115	Introductory Physics I	4
PHYS 116	Introductory Physics II	4
PSCL 101	General Psychology I	3
SOCI 101	Introduction to Sociology	3

Students may have completed some of these required courses prior to the start of this program and thus the students would be eligible for exemption from taking these courses for the certificate. Depending on course grades, students, with approval of the program director, may waive the required courses. Students may also elect to retake these courses for reference and/or to improve their undergraduate GPA.

### Elective Coursework

In consultation with the program director, students will develop the best program of study for their needs. Typically, if a student has already taken the medical school prerequisites, but needs to improve their overall undergraduate GPA, taking upper-level undergraduate courses

would show more rigor compared to retaking lower-level courses. With successful grades, a student's undergraduate GPA will also improve.

Students may take additional elective coursework across the university with program director and instructor approval. Although science and math classes will be the primary focus for most students, some students may also seek to take graduate coursework to demonstrate academic rigor. Further, some students may also elect to take other courses based on interests or a desire to improve technical skills (such as writing or language skills).
