SCHOOL OF NURSING COURSES

NUAN Courses

NUAN 443. Professional Role. 1 Unit.
This course will explore the role of the Certified Registered Nurse Anesthetist. Emphasis will be placed on the historical development of the role, regulation of practice, professional organizations, and professional practice standards and guidelines.

NUAN 450. Pharmacological Strategies in Anesthesia Practice. 2 Units.
This course will provide a comprehensive analysis of anesthetic agents, adjunct drugs, and pharmacologic principles related to the practice of anesthesia. The interaction between anesthetic agents and other pharmacologic therapy will be identified. (Admission to program or permission of instructor required.)

NUAN 458. Principles of Anesthesia I. 4 Units.
This course will introduce the student to the practice of nurse anesthesia. Emphasis will be placed on development of foundational knowledge, skills, and techniques necessary for delivery of safe, effective anesthesia care across the lifespan. This will be the first of two courses to provide an overview of the fundamentals of anesthesia practice. This course will focus on knowledge and skills necessary to deliver safe anesthesia care. (Enrollment in nurse anesthesia program)

NUAN 459. Principles of Anesthesia II. 4 Units.
This course will introduce the student to the practice of nurse anesthesia. Emphasis will be placed on development of foundational knowledge, skills, and techniques necessary for delivery of safe, effective anesthesia care across the lifespan. This will be the second of two courses to provide an overview of the fundamentals of anesthesia practice. This course will focus on principles applicable to specific patient populations. Prereq: NUAN 458.

NUAN 460. Advanced Principles of Anesthesia 1. 4 Units.
This course will provide an in-depth exploration of the anatomy, physiology, and pathophysiology of the cardiovascular, respiratory, and hematologic systems in the context of anesthesia care. Implications of disease states in these systems for all types of surgery will be explored, with emphasis on anesthetic management of surgical procedures related to these systems. Prereq: NUAN 459.

NUAN 461. Advanced Principles of Anesthesia 2. 3 Units.
This course will provide an in-depth exploration of the anatomy, physiology, and pathophysiology of the renal, endocrine, immunologic, musculoskeletal, hepatobiliary, and neurologic systems in the context of anesthesia care. Implications of disease states in these systems for all types of surgery will be explored, with emphasis on anesthetic management of surgical procedures related to these systems. Prereq: NUAN 460.

NUAN 462. Advanced Principles of Anesthesia III. 3 Units.
This course will provide an in-depth exploration of the anatomy, physiology, and pathophysiology of pediatric, obstetric, geriatric, and obese patients within the context of anesthesia care. Implications of physiologic changes across the lifespan will be explored, with emphasis on the anesthetic management of anesthetic and surgical procedures related to these patient populations. Prereq: NUAN 461.

NUAN 450. Pharmacological Strategies in Anesthesia Practice. 2 Units.
This course will provide a comprehensive analysis of anesthetic agents, adjunct drugs, and pharmacologic principles related to the practice of anesthesia. The interaction between anesthetic agents and other pharmacologic therapy will be identified. (Admission to program or permission of instructor required.)

NUAN 458. Principles of Anesthesia I. 4 Units.
This course will introduce the student to the practice of nurse anesthesia. Emphasis will be placed on development of foundational knowledge, skills, and techniques necessary for delivery of safe, effective anesthesia care across the lifespan. This will be the first of two courses to provide an overview of the fundamentals of anesthesia practice. This course will focus on knowledge and skills necessary to deliver safe anesthesia care. (Enrollment in nurse anesthesia program)

NUAN 459. Principles of Anesthesia II. 4 Units.
This course will introduce the student to the practice of nurse anesthesia. Emphasis will be placed on development of foundational knowledge, skills, and techniques necessary for delivery of safe, effective anesthesia care across the lifespan. This will be the second of two courses to provide an overview of the fundamentals of anesthesia practice. This course will focus on principles applicable to specific patient populations. Prereq: NUAN 458.

NUAN 460. Advanced Principles of Anesthesia 1. 4 Units.
This course will provide an in-depth exploration of the anatomy, physiology, and pathophysiology of the cardiovascular, respiratory, and hematologic systems in the context of anesthesia care. Implications of disease states in these systems for all types of surgery will be explored, with emphasis on anesthetic management of surgical procedures related to these systems. Prereq: NUAN 459.

NUAN 461. Advanced Principles of Anesthesia 2. 3 Units.
This course will provide an in-depth exploration of the anatomy, physiology, and pathophysiology of the renal, endocrine, immunologic, musculoskeletal, hepatobiliary, and neurologic systems in the context of anesthesia care. Implications of disease states in these systems for all types of surgery will be explored, with emphasis on anesthetic management of surgical procedures related to these systems. Prereq: NUAN 460.

NUAN 462. Advanced Principles of Anesthesia III. 3 Units.
This course will provide an in-depth exploration of the anatomy, physiology, and pathophysiology of pediatric, obstetric, geriatric, and obese patients within the context of anesthesia care. Implications of physiologic changes across the lifespan will be explored, with emphasis on the anesthetic management of anesthetic and surgical procedures related to these patient populations. Prereq: NUAN 461.
NUED Courses

NUED 402. Common and Acute Health Problems of Children for Nursing Education. 3 Units.
This course introduces the common and acute health problems occurring in infancy through adolescence using a bio/psycho/social/cultural approach. Pathophysiology, assessment and teaching strategies specific to acute and common problems in children will be emphasized. Education strategies used to enhance, maintain and restore health will be discussed. Prereq: NUNP 401.

NUED 403. Management of Complex Chronic Problems in Children for Nursing Education. 3 Units.
This course focuses on the primary and rehabilitative health care concepts specific to the management of complex, multi-dimensional health problems experienced by infants, children and adolescents within the context of their family and community environments. Emphasis will be placed on the educational approaches to promote interprofessional communication. Prereq: NUED 402.

NUED 419. Family Health Nursing: Health of Adults and Older Adults. 3 Units.
This course introduces the student to the practice of primary health care of adults and older adults. The course includes principles of growth and development, health promotion, disease prevention and management of common acute and chronic health problems. Emphasis is placed on the biological, psychological, social and cultural aspects of care. Pathophysiology, assessment and diagnostic techniques specific to the acute and common problems are stressed. Nursing strategies related to health problems used to enhance, maintain, and restore health are emphasized. Health-seeking behaviors and the impact of the family on the adult and older adult are stressed. Prereq: NURS 459. Coreq: NURS 430.

NUED 432. Common & Acute Health Problems of the Adult and Older Adult. 3 Units.
This course introduces the common and acute health problems occurring across the adult life span. A problem-oriented approach is used with emphasis on the biological, psychological, social, and cultural aspects of care. Pathophysiology, pharmacology, assessment, and diagnostic strategies specific to the common problems of adults and older adults will be included. Nursing strategies used to enhance, maintain, and restore health will be emphasized. Prereq: NURS 459 and NUNP 410. Coreq: NURS 430.

NUED 434. Advanced Management in Adult and Older Adult Primary Care. 3 Units.
This course focuses on the health care concepts specific to the management of complex multidimensional health problems experienced by adults, older adults within the context of their family and community environments. Pathophysiology, assessment, and diagnostic strategies specific to complex health problems are emphasized. The selection of management strategies used to enhance outcomes will be stressed. Prereq: NUED 449.

NUED 438. Foundations in Acute Care Nursing of Adults and Older Adults for Nursing Education. 3 Units.
The course focuses on establishing elements of acute care and critical care nursing practice assessment and diagnostic reasoning across the continuum of healthcare services. Content is designed to develop application of specialized physiologic and psychological knowledge to meet needs of adults and older adults with complex acute and/or chronic health conditions as a basis for teaching acute and critical care nursing. Advanced pathophysiology is strongly recommended. Prereq: NURS 459.

NUED 443. Acute Health Problems of Adults and Older Adults. 4 Units.
Emphasis in this second of sequenced Adult-Gerontology Acute Care Nursing education courses is on the pathophysiology, assessment, and diagnostic approaches to adults and older adults with complex acute and chronic health disorders that manifest with physiologic instability. The content focuses on further development of diagnostic reasoning, clinical judgment, caring practices, and collaboration in health care systems that deliver acute and critical care nursing.

NUED 444. Management of Acutely Ill Adults and Older Adults for Nursing Education. 2 Units.
This course focuses on concepts specific to complex, multi-dimensional health problems of acute and critically ill adults and older adults. Content focuses on management of patients with complex health problems and life-threatening conditions across the entire adult spectrum. Prereq: NUED 443.

NUED 449. Primary Care of the Older Adult. 3 Units.
This course will focus on the assessment of the older adult’s nutritional needs, functional status, mental status (cognitive and affective), social support systems, and caregiver stress. These factors are analyzed in various environments, such as acute care, ambulatory care, home care, day care, long-term care, and rehabilitation. Epidemiological and health behavior models are used to assess health risks, assist with problem identification, primary, secondary, and tertiary prevention strategies. Cultural, ethnic, and developmental issues are addressed. Concepts, assessment strategies, interventions and evaluation approaches specific for older adults are identified. Prereq: NUED 432.

NUED 454. Well Woman Health Care. 2 Units.
The focus of this course is the application of theory, practice and research for promotion of health and wellness in the assessment and management of common gynecologic and family planning issues encountered by a diverse population of women in ambulatory settings. Emphasis is on promotion of health behaviors, identification and management of deviations from normal, anticipation of problems and the importance of consultations, referrals and collaborative management. Culturally appropriate interventions are integrated throughout. Prereq: NURS 459.

NUED 455. The Childbearing Family. 2 Units.
The focus of this course is the application of theory, practice and research in promotion of health and wellness of childbearing women using a family-centered approach. Emphasis is on normal aspects of pregnancy, promotion of health behaviors, identification and management of deviations from normal, anticipation of problems and the importance of consultations, referrals and collaborative management. Prereq: NUED 454. Coreq: NURS 430.

NUED 457. Labor and Birth. 3 Units.
The focus of this course will be the application of theory and research to evaluate how evidence-based care promotes the health and well-being of childbearing women, newborns and their families during intrapartum and the immediate postpartum period. Emphasis will be placed on the health-seeking behaviors of the mother and her family using a holistic approach that respects cultural, ethnic, and racial diversity in the provision and evaluation of care. The student will learn to identify normal processes, anticipate and identify complications, and to demonstrate the importance of consultations, referrals, and collaborative management. Prereq: NUED 455.
NUMED 509. Curriculum and Instruction. 3 Units.
The purpose of this course is to explore the theoretical underpinnings of education and to examine innovative approaches to critical thinking. Students are provided the opportunity to analyze philosophies and principles of education along with teaching and learning styles. The focus of this course is on curriculum planning and development congruent with the philosophy and objectives of a nursing program. Curriculum development includes determination of program and course objectives, along with selection and organization of appropriate learning experiences to meet these objectives. Techniques for instruction in the classroom, laboratory, and clinical settings are explored.

NUMED 559. Primary Care in Women's Health. 2 Units.
In this course, students gain knowledge needed to assess and manage primary healthcare problems commonly encountered by diverse populations of women in ambulatory settings. This course prepares the student to use the problem solving approach to assist individuals with common acute and chronic health problems. Culturally appropriate health promotion and disease prevention are integrated throughout. Students are introduced to the dynamics of the managed care environment. Prereq: NUMED 455.

NUMED 609. Theoretical Foundations of Educational Testing and Evaluation. 2 Units.
In this course, an overview of educational measurement and evaluation is provided. Methods of evaluating teaching effectiveness, student learning, and student performance are explored. Prereq: NUMED 509.

NUMN Courses

NUMN 400. Guided Study. 1 - 12 Units.
Independent guided study for students with special interests and/or curricular needs. May include didactic, lab, and/or clinical experiences. Separate guided study plan form required. Faculty consent required to register.

NUMN 401. Introduction to the Discipline and Practice of Nursing. 6.5 Units.
This course is an introduction to the discipline and practice of nursing. Factors influencing health and illness will be explored. Selected nursing strategies and interventions designed to support the maximum health potential of the adult client will be incorporated into lab sessions and practiced in acute care and other settings as arranged. Historical, societal, and legal influences on nursing and the role and functions of the professional nurse will be examined. Coreq: NUMN 402 and NUMN 410.

NUMN 402. Pharmacology for the Advanced Generalist Nurse. 3 Units.
This course is an introduction to the principles of pharmacology and pharmacotherapeutics, including characteristics of the major drug classifications with emphasis on drug action and adverse effects. Students will apply knowledge of pharmacology to implications for safe, patient-centered nursing care. Coreq: NUMN 401 and NUMN 410.

NUMN 403. Introduction to Nursing Informatics. 1 Unit.
This course will introduce students to the concepts of health informatics and the role nurses play in the management of information within the healthcare setting. Foundational knowledge that supports clinical practice, education, research, and administration will be studied as well as core models and theories of nursing informatics. Students will develop an awareness of the importance of nursing involvement in the design, implementation, and use of information systems and other technologies. Coreq: NUMN 401.

NUMN 405. Pathophysiology for the Advanced Generalist Nurse. 3 Units.
This course in clinical pathophysiology examines the biological basis and pathophysiological outcomes of selected disease processes that alter human physiologic and cognitive function. Students will relate the pathogenesis of selected disease conditions and pathologic states to their risk factors, symptomatology, and prevention. Prereq or Coreq: NUMN 401.

NUMN 406. Nursing Care of Older Adults in Health and Illness. 2.5 Units.
This course will explore the concept of aging in health and illness with an emphasis on the older adult as an individual with the capacity to grow and develop. Theories of aging, geriatric syndromes, and the multiple interacting determinants influencing the health of older adults will be examined. Students will design and implement theory and evidence-based, safe, patient-centered nursing interventions tailored to the unique needs of older adults. Prereq or Coreq: NUMN 401 and NUMN 410.

NUMN 407. Acute Care Nursing of the Adult. 8.5 Units.
The focus of this course is the integration of the nursing process in clinical practice. Human responses to significant health events and alterations are analyzed. Application of relevant physiology, psychosocial dimensions, and pharmacology are included. Particular emphasis is placed on nursing strategies, interventions, and the evaluation of their effectiveness in the care of the acutely ill adult. Prereq: NUMN 401 and NUMN 410.

NUMN 409. Advanced Generalist: Health Policy, Advocacy, and Economics. 1.5 Unit.
This course is designed to address professional role development of the advanced generalist nurse. In this course, students will examine economics, health policy, and advocacy and the role of the advanced generalist nurse as political activist and policy advocate within the U.S. health care delivery systems of care. Policies that influence health care economics, safety, and quality will be investigated. Prereq: NUMN 414.

NUMN 410. Health Assessment for the Advanced Generalist Nurse. 2.5 Units.
This course uses a comprehensive, system-by-system, patient-centered approach to provide students with assessment and interviewing skills required for practice as an advanced generalist nurse. Students will apply critical thinking to make decisions regarding utilization of assessment findings including communication of the findings to the patient. Coreq: NUMN 401.

NUMN 411. Nursing Care of Populations in Communities. 3 Units.
This course will focus on instructional and clinical learning experiences with populations in the community, including vulnerable populations. Students will examine the influence of communities on the health of populations using an ecological perspective. Culturally-sensitive, asset-based strategies and analytical skills will be used to assess, describe, and implement nursing interventions to populations in the community. Coreq: NUMN 401.

NUMN 413. Issues and Ethics in Health Care. 2 Units.
This course introduces students to the principles underlying ethical issues and methods of rational decision making. Fundamental theories will be reviewed and applied through case analyses to address ethical dilemmas common to modern health care.

NUMN 414. Concepts in Nursing Management. 2.5 Units.
This course focuses on the study of basic concepts related to management in nursing and working with multidisciplinary teams in the provision and coordination of care. Concepts of nursing management including; planning, organizing, staffing, delegating, and budgeting within healthcare settings will be discussed. Coreq: NUMN 407.
NUMN 415. Parents and Neonates in Health and Illness. 4.25 Units. 
This course will focus on the health needs of women and families in the preconception, antepartum, intrapartum, and postpartum period. Health topics related to the reproductive system will be explored. The influence of intervening variables on bio-psycho-social development of the childbearing family will be analyzed. In the clinical experience, students will implement and evaluate nursing strategies designed to enhance health in parents and neonates in health and illness. Prereq: NUMN 407.

NUMN 416. Children and Families in Health and Illness. 4.25 Units. 
This course is the study of children from infancy through adolescence and their health status from a developmental perspective. Emphasis is on healthy children as well as those with common acute and chronic illness within the context of their family environment. Nursing strategies focus on interventions to promote, restore, and maintain health and foster growth and development. These strategies are based on understanding advanced concepts of children’s and families’ responses in health and illness. Prereq: NUMN 407. Coreq: NUMN 414.

NUMN 417. Psychiatric Mental Health Nursing. 4 Units. 
This course is designed to address psychiatric nursing concepts related to mental illness and addiction. The focus is on achieving optimal health for clients with acute and chronic psychiatric disorders using interpersonal techniques and applying the nursing process. Nursing strategies that are appropriate for assessment and intervention with individuals, families, and groups to facilitate optimal mental health and recovery will be discussed and evaluated. Prereq: NUMN 407

NUMN 418. Intro to Critical Care Nursing. 6 Units. 
The focus of this course is on integrating the knowledge and skills required to safely and effectively provide quality patient care in the critical care setting. Emphasis is placed on implementation of the nursing process and standards of practice required to care for critically ill patients and their families. The didactic component includes topics on current practice and trends in critical care nursing. The clinical component provides students with opportunities to implement the roles and functions of the advanced generalist nurse. Prereq or Coreq: NURS 502.

NUMN 419. Advanced Generalist Nurse Leadership. 2.5 Units. 
This course is part of the concentration in leadership for safe quality healthcare. It provides students with clinical practice opportunities to synthesize knowledge, skills, and attitudes, and implement the roles of the advanced generalist nurse as leader for evidence-based quality healthcare for populations across the continuum of care. Coreq: NURS 451, NURS 502, and NUMN 409.

NUMN 420. Clinical Immersion. 1 Unit. 
This clinical immersion will build on previous MN clinical and didactic coursework and provide opportunities to integrate and apply knowledge and skills in a selected patient population. The course will enhance preparation for entry into professional nursing practice. Coreq: NUMN 418.

NUnd Courses

NUnd 450. Applied Statistics. 3 Units. 
This course provides an advanced overview of the assumptions and applications necessary to analyze and interpret questions and research related to clinical practice. Emphasis will be on statistical interpretation of research. During the course, data management, statistical analysis, and data interpretation, as well as univariate, bivariate, and multivariate statistics such as ANOVA and ANCOVA will be examined. The data analysis process will be examined and deconstructed throughout the course. Offered as NUND 450 and NURS 532. Prereq: STAT 201 or equivalent within past 5 years.

NUnd 504. Theories for Nursing Practice and Scholarship. 3 Units. 
This initial course in the Doctor of Nursing Practice program will examine perspectives of the discipline, the nature of theory, theory development in nursing, and significant conceptualizations of nursing and related disciplines. Application of theory to practice, practice change and scholarship will be explored.

NUnd 506. Leadership in Organizations and Systems. 3 Units. 
This course introduces the student to organizational design and leadership. The focus is developing skills to effectively lead individuals and teams toward maximizing organizational effectiveness. Elements of this course will include: diversity, organization culture, systems, communication, innovation and change.

NUnd 507. Business Concepts in Advanced Nursing Practice. 3 Units. 
This course will focus on business concepts and issues related to advanced nursing practice leadership. Seminars will focus on integrating business-related ethical, legal, fiscal, and other intervening variables that affect environments of care. Prereq: NUND 506.

NUnd 508. Health Care Policy and Planning. 3 Units. 
The primary focus of this course is to explore the leadership role of nurses in health policy development and implementation as well as the role of research in health care policy formation and planning. Special emphasis is placed on selected national and international health policy issues that form the socio-political and economic context of nursing care and practice. Ethical dimensions of public policy formulations and implementation are highlighted. Offered as NUND 508 and NURS 609.

NUnd 509. Curriculum and Instruction. 3 Units. 
The purpose of this course is to explore the theoretical underpinnings of education and to examine innovative approaches to critical thinking. Students are provided the opportunity to analyze philosophies and principles of education along with teaching and learning styles. The focus of this course is on curriculum planning and development congruent with the philosophy and objectives of a nursing program. Curriculum development includes determination of program and course objectives, along with selection and organization of appropriate learning experiences to meet these objectives. Effective techniques for instruction in the classroom, laboratory, and clinical settings are explored.

NUnd 510. Application of Health Information Technology and Systems. 1 Unit. 
In this course, an overview of health information technology (HIT) is provided with focus on use of HIT in health care settings and among consumers. Course content includes use and evaluation of HIT by health care providers and patients.
NUND 512. Advanced Leadership and Management in Health Care Organizations. 2 Units.
This course will focus on the system-level executive leadership role of nurses in health care organizations. The course will examine strategic leadership and management planning, process improvement, and local, national, and global influences on health system functioning. Emphasis will be placed on developing executive strategies within the dynamics of competitive health care environments. Prereq: NUND 504 and NUND 506.

NUND 540. Practice Focused Inquiry I. 3 Units.
This course will introduce the student to a variety of approaches that can be used for practice-focused inquiry, including concepts related to population health. Applications of beginning elements of the scholarly process to practice-focused inquiry will be reviewed. Elements include development of a problem statement and literature review. (Alternate pre-req to NUND 450: Applied statistics course within the past 5 years). Prereq: NUND 504 and NUND 450.

NUND 541. Practice-Focused Inquiry II. 3 Units.
This course builds on Practice-Focused Inquiry I. The content expands student understanding of practice-focused methodology, including aims, a conceptual or theoretical framework, setting, sample, sources of data, measures and instruments. The student applies appropriate methodology to the development of a plan for their scholarly practice-focused project. Ethical issues and mechanisms for dissemination of the project results are included. Prereq: NUND 540.

NUND 607. Advanced Leadership and Management in Healthcare. 2 Units.
This course will build upon and apply knowledge of leadership strategies from previous coursework. Students will address the successful management of clinical challenges within the dynamic healthcare environment. The course will emphasize the development of strategic capacity, enabling students to navigate complex clinical issues within the healthcare setting. Prereq: NUND 507.

NUND 609. Theoretical Foundations of Educational Testing and Evaluation. 2 Units.
In this course, an overview of educational measurement and evaluation is provided. Methods of evaluating teaching effectiveness, student learning, and student performance are explored. Prereq: NUND 509.

NUND 610. Translating Evidence into Nursing Practice. 3 Units.
This course focuses on methods for developing best practice protocols, and translating them into practice.

NUND 611. DNP Practicum. 1 - 2 Units.
Under the guidance of the faculty advisor and designated mentor(s), the student will develop, implement and evaluate specific clinical practice experience(s) that prepare the student to lead in collaborative practice. Selected competencies of the DNP-prepared nurse will be advanced. Note: Admission to the DNP Program required. Prereq: NUND 504 or NUND 506.

NUND 612. Transformational Leadership in Executive Nursing Practice. 3 Units.
This course will focus on transformational leadership and entrepreneurial concepts as applied to executive nursing practice. This course will include theoretical understandings of innovation, visioning and inspirational skills to lead change and improve clinical nurse and patient/client outcomes at the organizational system level, within the context of complex health care systems. Prereq: NUND 512.

NUND 615. Teaching Practicum. 1 - 6 Units.
In this preceptored teaching practicum, the student may engage in classroom, laboratory, and clinical teaching assignments in nursing. The student will be expected to use current educational theory and nursing knowledge in completing the practicum experience (minimum 60 hours). Prereq: NUND 609 or NURS 619.

NUND 619. DNP Project Proposal Development. 1 - 2 Units.
Under the guidance of the student's chair and committee, the student will develop a proposal for a project to address a practice-based problem. Prereq: NUND 541.

NUND 620. Scholarly Project. 1 - 3 Units.
Under the guidance of their advisor and committee, the student will complete a systematic investigation of a previously identified problem. The experience will culminate with a written report of the findings. (Completion of all DNP coursework; may be concurrent with NUND 611). Prereq: NUND 619.

NUNP Courses

NUNP 401. Development and Health Promotion in Children and Adolescents. 3 Units.
This course will examine the concepts of development and health promotion in children and adolescents. Concepts and theories from nursing and other related disciplines will be explored. Clinical application of theories and advanced nursing strategies to optimize the health of children, adolescents, and their families will be emphasized in the professional role development of students. Prereq: Enrolled in MSN program.

NUNP 402. Common and Acute Health Problems of Children. 6 Units.
This course will introduce the common and acute health problems occurring in infancy through adolescence using a biological, psychological, social, cultural, and family-centered approach. Knowledge of pathophysiology, advanced assessment, and diagnostic reasoning for acute and common problems in children and adolescents will be emphasized. Strategies used to improve health outcomes will be discussed. Prereq: NURS 453, NURS 459 and NUNP 410. Prereq or Coreq: NURS 430.

NUNP 403. Advanced Management in Pediatric Primary Care. 5 Units.
This course will focus on the primary and rehabilitative health care management of complex, multi-dimensional health problems experienced by children and adolescents within the context of their family and community environments. Pathophysiology, advanced assessment, and diagnostic reasoning specific to complex health problems in children and adolescents will be emphasized. Emphasis will be placed on the consultation and referral processes within interprofessional teams. Prereq: NUNP 402.

NUNP 405. Foundations for the Neonatal Nurse Practitioner. 3 Units.
This course introduces the role of the Neonatal Nurse Practitioner and concepts relevant to the management of the neonate. Students analyze nursing strategies to optimize health behaviors in families with neonates. Coreq: NUNP 416.

NUNP 410. Health Promotion Across the Life Span. 2 Units.
This course introduces diagnostic reasoning skills related to health promotion, disease prevention, and maintenance of function across the lifespan. Students develop skills that foster wellness in individuals, families, and communities. Epidemiological principles, risk appraisals, and other strategies are incorporated.
NUNP 412. Health Problems of the Neonate. 4 Units.
This course will focus on the high-risk neonate. Advanced practice nursing strategies that enhance, maintain, and restore health in ill neonates and their families will be addressed Diagnostic and therapeutic approaches specific to the neonate will be emphasized. Prereq: NUNP 405 and NUNP 416.

NUNP 413. Adv Mgmnt Acutely Ill Neonate. 3 Units.
This course will focus on assessment, and diagnostic approaches in implementation of management plans for neonates with acute health problems. Pathophysiologic changes specific to neonates with acute health problems will be incorporated. Concepts related to discharge planning and long-term follow-up will be introduced. Prereq: NUNP 405 and NUNP 412.

NUNP 414. Advanced Management of Neonates with Complex Health Problems. 5 Units.
This course will focus on assessment and diagnostic approaches in implementation of management plans for neonates with acute and complex health problems. Pathophysiologic changes specific to neonates with complex health problems will be incorporated. Emphasis will be placed on consultation and referral processes within interprofessional teams. Prereq: NUNP 413.

NUNP 416. Integrated Assessment of the Neonate. 3 Units.
This course will introduce principles fundamental to the integrated assessment of the neonate. It will stress perinatal history taking including assessment of genetic risks, gestational age assessment, and physical assessment skills. The course will provide the basis for problem identification, decision making, advanced therapeutics, and case management. Coreq. NUNP 405.

NUNP 419. Family Health Nursing: Health of Adults and Older Adults. 5 Units.
This course is an introduction to the practice of primary health care of adults and older adults. Principles of health promotion, disease prevention, management of common acute and chronic health problems and the impact of the family are incorporated. Emphasis is placed on the physical, psychological, social and cultural aspects of care. Pathophysiologic, assessment and diagnostic techniques specific to the common acute and chronic health problems are integrated. Strategies related to health and illness care are used to enhance, maintain, and restore health. Collaboration with other health care professionals to enhance patient outcomes is explored. Prereq: NURS 453, NURS 459 and NUNP 410. Coreq: NURS 430.

NUNP 429. Health Promotion & Common Reproductive Health Problems of Adolescents and Adults. 4 Units.
This course introduces the student to the care of the woman from puberty through menopause and her family. Physical and psychosocial health and deviations before, during, and after the childbearing years are assessed. The course content includes principles of education for childbearing, parenting, and fertility control. Strategies to optimize health-seeking behaviors are identified. Content on pregnancy and postpartum care is integrated into the course. Prereq: NURS 459.

NUNP 432. Common & Acute Health Problems of the Adult and Older Adult. 5 Units.
This course will introduce the common and acute health problems occurring across the adult life span. A problem-oriented approach will be used with emphasis on the biological, psychological, social, and cultural aspects of care. Advanced assessment, and diagnostic reasoning strategies specific to the acute and common problems of adults and older adults will be included. Principles of pathophysiology and pharmacology will be incorporated. Advanced practice nursing strategies to enhance, maintain, and restore health will be emphasized. Prereq: NURS 453, NURS 459 and NUNP 410. Prereq or Coreq: NURS 430.

NUNP 434. Advanced Management in Adult and Older Adult Primary Care. 5 Units.
This course will focus on health care concepts specific to the management of complex multidimensional health problems experienced by adults and older adults within the context of their family and community environments. Pathophysiology, assessment, and diagnostic strategies specific to complex health problems will be emphasized. Principles of pathophysiology and pharmacology will be incorporated in the development, implementation, and evaluation of plans of care to enhance patient outcomes. Prereq: NUNP 449.

NUNP 438. Foundations for Adult-Gerontology Acute Care Nursing. 4 Units.
The course focuses on establishing elements of advanced nursing practice assessment and diagnostic reasoning across the continuum of healthcare services to meet the specialized physiologic and psychological needs of adults and older adults with complex acute and/or chronic health conditions. Prereq or Coreq: NURS 453 and NURS 459 or students with an MSN and NP certification, permission of faculty.

NUNP 439. Family Health Nursing: Health of Children and Adolescents. 4 Units.
In this course students are introduced to the influence of family dynamics in the practice of primary health care of children and adolescents. The course includes the application of the principles of growth and development, disease prevention, health promotion, and management of common acute and chronic health problems in children and adolescents. Clinical application of strategies to optimize health seeking behaviors is emphasized. Collaboration with other health care professionals to enhance patient care is reinforced. Prereq: NUNP 429.

NUNP 443. Acute Health Problems of Adults and Older Adults. 6 Units.
In this second of sequenced Adult-Gerontology Acute Care Nursing clinical courses, the emphasis is on the pathophysiology, assessment, and diagnostic approaches to adults and older adults with complex acute and chronic health disorders that manifest with physiologic instability. The clinical practicum focuses on further development of diagnostic reasoning, clinical judgment, caring practices, and collaboration in health care systems that deliver acute and critical advanced practice nursing. Prereq or Coreq: NURS 438 and NURS 459 and NURS 430 or Requisites Not Met permission.

NUNP 444. Advanced Management of Acutely Ill Adults and Older Adults. 4 Units.
This third clinical course in the Adult-Gerontology Acute Care Nurse Practitioner sequence focuses on concepts specific to complex, multidimensional health problems of acute and critically ill adults and older adults. Clinical practice focuses on the management of patients with complex health problems and life-threatening conditions across the entire adult population. Prereq: NUNP 443.
NUNP 449. Advanced Practice Nursing Care of the Older Adult. 4 Units. This course will integrate the principles of health promotion, disease prevention and rehabilitation in the care of older adults. The assessment of nutritional needs, functional status, mental status, social support systems, and caregiver stress will be addressed. These factors are analyzed in various environments of care. Cultural, ethnic, and developmental issues are addressed. The diagnosis, treatment and management of acute and chronic conditions associated with aging, but that can also occur in younger adults, are presented. Interventions appropriate to restore or maintain an optimal level of function will be included. Palliative and end-of-life care will be addressed. Prereq: NUNP 432.

NUNP 455. Management of Complex Acute Problems in Children and Adolescents I. 4 Units. This course will apply knowledge, evidence, advanced skills, interventions, and pharmacotherapy in the management of children and adolescents with acute, chronic and critical conditions within the context of family-centered care. Assessment strategies and management principles will be addressed. (Minimum of one year nursing experience in a pediatric acute care setting. Certification in PALS is required.) Prereq or Coreq: NUNP 402.

NUNP 456. Management of Complex Acute Problems in Children and Adolescents II. 5 Units. This course will integrate knowledge, research, advanced skills and interventions with children and adolescents with complex acute, critical and chronic health conditions. Advanced practice strategies and management principles will be addressed including knowledge and skills with technological assessment modalities and procedures associated with the care of acutely and critically ill children and adolescents within the context of family-centered care. Prereq: NUNP 455.

NUNP 464. Global Clinical Learning. 1 Unit. This course will allow the MSN student to engage in clinical work in low and middle income medically under resourced communities providing direct patient care under clinical supervision of MSN faculty. Students will prepare for the experience by gaining knowledge of the history and culture of the region, common diseases prevalent in the area and orientation to the site operations. The student will focus on the 1) steps to diagnose, treat and implement a plan of care for area specific diseases; 2) culturally and resource appropriate treatments; 3) dental hygiene and nutrition as they impact the health of the local population. Students will prepare culturally appropriate presentations for local nurses and contribute to the preparation of non-medical members of the team for patient safety using current evidence based practices. Offered as NUNP 464 and NURS 464. Prereq: Enrollment in MSN, DNP or PhD in Nursing Program.

NURS Courses

NURS 115. Fundamentals of Nursing. 4 Units. This course is designed to introduce the student to the practice, profession, and discipline of nursing. Critical historical influences on the development of the profession will be discussed. The relationship between evidence, theory, and nursing care will be explored. Contemporary nursing will be examined with a focus on patient safety, interdisciplinary care, and innovative strategies to attain optimum health. The basic components of the nursing process will be presented as a framework for beginning clinical practice.

NURS 122. Foundations of the Practice II. 3 Units. This course builds on the concepts essential to the foundations of nursing practice presented in previous nursing courses. It is designed to focus on strategies, skills, and techniques to obtain a comprehensive individual health history, family health history, and physical examination. Therapeutic interventions based on assessment and scientific knowledge will be performed. Prereq: BIOL 114, BIOL 116, and NURS 115, all with grades of C or better

NURS 160. Health Care in the Community. 1 Unit. This course is a seminar focused on the delivery of culturally appropriate, community-based health care and on selected issues contributing to the growing disparities in health care outcomes. Students will engage in a field experience in a Cleveland community health facility or school system. The seminar will include sessions devoted to reflection and evaluation of the field experience related to issues contributing to disparities in health care and content related to public health nursing.

NURS 201. Applied Nutrition in Health and Disease. 2 Units. This course builds upon the student’s knowledge of human physiology and metabolism. Nutrient requirements are highlighted as well as changes related to different stages in the lifespan. Contemporary nutritional issues will be addressed. Prereq: BIOL 114 and BIOL 116.

NURS 210. Teaching/Learning in the Community. 1 Unit. This course expands on foundational public health nursing concepts to develop student knowledge, skills, and attitudes in providing culturally competent health care to diverse populations using the service learning model. This course explores the relationships between, learning needs, health literacy, teaching/learning interventions and evaluation of learning. Utilizing a balance between knowledge-centered and skill-centered approaches to delivering culturally competent care, students will engage in both traditional classroom and transcultural experiential learning encounters. Prereq: NURS 160.

NURS 211. Introduction to Pharmacology 1. 1.5 Unit. This course is the first of two courses introducing the basic principles of pharmacology and pharmacotherapeutics, including review of characteristics and use of major drug classifications with emphasis on nursing implications. The pharmacological content presented in this course will be coordinated with Nursing Care of the Adult 1 with emphasis placed on patients experiencing co-morbid conditions. Prereq: BIOL 117, CHEM 119, NURS 122. Coreq: NURS 230 and NURS 250.

NURS 212. Introduction to Pharmacology 2. 1.5 Unit. This course is the second of two courses introducing the basic principles of pharmacology and pharmacotherapeutics, including review of characteristics and use of major drug classifications with emphasis on nursing implications. The pharmacological content in this course will be coordinated with Nursing Care of the Adult 2 with emphasis focused on patients experiencing co-morbid conditions. Prereq: NURS 211, NURS 230 and NURS 250. Coreq: NURS 240 and NURS 317.

NURS 230. Nursing Care of the Adult 1. 5 Units. This is the first of two courses focusing on the application of the nursing process to adults and older adults experiencing common acute and chronic health alterations. Special emphasis is placed on patient assessment, diagnostic testing, beginning medication teaching and administration, and other nursing interventions as they relate to caring for adults and older adults with alterations in fluid/electrolyte and acid/base balance, and respiratory, cardiac, genitourinary, and endocrine (diabetes) functioning. Care of the patient in the perioperative setting and care of the patient with cancer are also emphasized. Prereq: BIOL 117, CHEM 119, NURS 122. Coreq: NURS 211, NURS 250.
NURS 240. Nursing Care of the Adult 2. 4.75 Units.
This course builds upon the knowledge and skills mastered in NURS 230. Course content and learning opportunities provide students with the information necessary to collaborate with other members of the health care team in providing comprehensive care to adults and older adults. Students are expected to collaborate with members of the health care team to plan and implement interventions and to evaluate patient responses to selected interventions. Special emphasis is placed on patients experiencing co-morbid conditions which include alterations in immunologic, hematologic, gastrointestinal, musculoskeletal, and neurologic functioning. Prereq: CHEM 121, NURS 211, and NURS 230. Coreq: NURS 212.

NURS 250. Aging in Health and Illness. 2 Units.
This course will explore the concept of aging as a healthy developmental process with a particular focus on older adults as active, independent and contributing members of the community. Content will include the process of healthy aging, major health problems for which older adults are at risk, and policy issues. Prereq: BIOL 117, CHEM 119, NURS 122. Coreq: NURS 211.

NURS 260. Evidence Based Public Policy in the Community. 1 Unit.
This course expands on foundational public health nursing concepts to develop student knowledge, skills, and attitudes in providing culturally competent health care to diverse populations using the service learning model. Utilizing a balance between knowledge centered and skill centered approaches students will apply concepts of team work and collaboration to experiential learning outcomes. Prereq: NURS 160.

NURS 277. BCLS and First Aid for Health Care Providers. 0 Unit.
Designed for healthcare professional students, this course follows the American Heart Association Basic Life Support (BLS) for Healthcare Providers Course objectives. It provides a variety of healthcare professional students the ability to recognize several life-threatening emergencies, provide CPR, use an AED, and relieve choking in a safe, timely and effective manner. Basic first aid skills are also included in this course.

NURS 310. Leadership in the Community. 1 Unit.
This public health course is designed to develop student knowledge, skills and attitudes in providing culturally competent health care to diverse populations, using the service learning model. Students will explore nursing’s role as a community health advocate in the promotion of health and the elimination of health disparities. Utilizing a balance between knowledge-centered and skill centered approaches to delivering culturally competent care, students will apply leadership concepts in both traditional classroom and transcultural experiential learning encounters. Prereq: NURS 210 and NURS 260.

NURS 315. Parents and Neonates in Health and Illness. 4.5 Units.
This course focuses on the study of child bearing families and their health-seeking behaviors from a developmental perspective. Content includes nursing knowledge and skills related to assessment of health status of parents and neonates. Nursing strategies focusing on interventions to promote, restore, and maintain health are discussed. Prereq: NURS 212, NURS 240, NURS 317, NURS 342, and SOCI 203.

NURS 316. Infants, Children, and Adolescents in Health and Illness. 4.5 Units.
The study of infants, children, and adolescents, and the health-seeking behaviors from a developmental perspective. Emphasis is on healthy infants, children, and adolescents as well as infants, children, and adolescents with common, acute, and chronic illness within the context of their family environment. Nursing strategies focus on interventions to promote, restore, and maintain health and foster growth and development. Prereq: NURS 212, NURS 240, NURS 317, NURS 342, and SOCI 203. Coreq: NURS 315.

NURS 317. Psychiatric-Mental Health Nursing. 3.75 Units.
The course is designed to address health-seeking behavior patterns within the context of psychiatric and mental health nursing concepts. The focus is on clients with psychiatric disorders and their mental health. Nursing strategies that are appropriate for assessment and intervention with individuals, families, and groups to facilitate optimal mental health will be discussed and practiced. Prereq: NURS 211 and NURS 230. Coreq: NURS 212.

NURS 320. Theoretical and Evidence Bases for Best Practice in Nursing. 3 Units.
This course explores the theoretical and evidence bases for best practices in nursing. The course begins with an overview of the theoretical and philosophical underpinnings of nursing practice and nursing science. The course includes an intensive focus on the concept of evidence based practice and the process of evaluation supporting practice. Additionally, the course introduces evaluation models used to determine the effectiveness and quality of existing practice and to recommend improvements. Counts as SAGES Departmental Seminar. Prereq: STAT 201 or STAT 201R.

NURS 338. Care of the Adult and Older Adult with Complex Health Alterations. 4.5 Units.
The purpose of this course is to provide the student with the knowledge and skills to care for one or more complex, acutely ill adult patients, who present with co-morbid conditions and may be dependent on technologies. This complexity encompasses the physical, psychological, social, spiritual, and ethical domains of care and includes both patient and the family. Prereq: NURS 212, NURS 240, NURS 342 and NURS 317. Coreq: NURS 339.

NURS 339. Care of the Perioperative Patient. 3.5 Units.
The purpose of this course is to provide the student with a dynamic learning experience in a perioperative environment to enhance the knowledge, cognitive and psychomotor skills to care for one or more patients undergoing operative or invasive procedures. The Perioperative Patient-Focused Model (AORN, 2008) will provide the framework for this course. This Model addresses patient centered care, patient safety, physiologic responses, and behavioral responses of the patient and family. In addition, content will cover issues of quality and safety, informatics, and identification of evidence based practice within the perioperative context. The clinical setting is interdisciplinary and multidisciplinary with other members of the perioperative team. As a member of this team, the student will develop strategies to inspire team work and collaboration with emphasis on communication, patient advocacy and leadership skills. Prereq: NURS 212, NURS 240, NURS 317 and NURS 342. Coreq: NURS 338.
NURS 341. Concepts of Management and Leadership. 3 Units.
This course focuses on the study of basic concepts related to leadership and management in the provision of nursing care. Highlighted units of instruction include organizational culture and structure, leading high performing teams, human and capital resource management, delegation and outcome evaluation. The management functions of planning, organizing, directing and evaluating are explored. Prereq: NURS 315, NURS 316, NURS 338, NURS 339.

NURS 342. Medical Microbiology, Immunity, and Infectious Disease. 4 Units.
Introduction to viral, bacterial, rickettsial, fungal and parasitic organisms pathogenic to humans, known to be the etiological agents of infectious diseases. Review of the course, manifestations, pathogenesis, epidemiology and therapies of selected diseases associated with the infectious disease intervening variable. Prereq: BIOL 117 and CHEM 121.

NURS 343. Issues and Ethics in Health Care. 2 Units.
This course is designed to introduce the student to the principles underlying ethical issues and methods of rational decision making. Fundamental theories will be reviewed and opportunity provided, using case analysis, to apply the theories in addressing ethical dilemmas common to modern health care. Prereq: NURS 315, NURS 316, NURS 338, and NURS 339.

NURS 352. Acute Care 3. 8 Units.
This course focuses on the knowledge and skills necessary to provide nursing care for patients with complex problems. Emphasis is on nursing strategies designed to provide comprehensive care to patients and their families affected by acute illness. Clinical practice is directed toward the care of acutely ill adults. Prereq: NURS 338 and NURS 339.

NURS 354. Nursing Care of Critically Ill Adults. 8 Units.
This course focuses on the integration of knowledge and skills to provide effective and efficient nursing care to critically ill patients. Emphasis is on nursing strategies directed towards the care of the critically ill patient with a focus on the use of biomedical technology, planning and managing patient care, and beginning care of patients with complex care needs. Prereq: NURS 338 and NURS 339.

NURS 356. Nursing Care of Critically Ill Neonates, Infants, and Children. 8 Units.
This course focuses on the knowledge and skills necessary for beginning practice in the nursing care of critically ill neonates, infants and children. Emphasis is on nursing strategies directed toward the application of basic principles of critical care nursing with attention to special needs of critically ill neonates, infants and children and their families. Prereq: NURS 338 and NURS 339.

NURS 360. Process Change in the Community. 1 Unit.
This public health nursing course is designed to develop student knowledge, skills, and attitudes in providing culturally competent health care to diverse populations, using the service learning model, by analyzing key community components that influence health and wellness. Students will explore nursing's role as a community health advocate in the promotion of health and the elimination of health disparities. Utilizing a balance between knowledge-centered and skill-centered approaches to delivering culturally competent care, students will engage in both traditional classroom and transcultural experiential learning encounters. Prereq: NURS 210 and NURS 260.

NURS 370. Information Technologies in Health. 1 Unit.
The focus of this course is the application of advanced information technologies in the health care of communities and populations. Building on a base of pre-requisite informatics course knowledge and student clinical experiences, the course will explore contemporary issues in informatics and the ways in which a nurse can manage the information to support the delivery of care to clients, communities, and populations.

NURS 371. Population Health Nursing. 3 Units.
In this course, students will develop knowledge and competencies in applying key concepts of population-based health, including public health nursing, social determinants of health, and epidemiology to care for individuals, families, communities, and populations. Through classroom experiences, students will discover strategies to assess, plan, implement, and evaluate population-focused programs. Prereq: NURS 310 and NURS 360.

NURS 372. Health in the Global Community. 3 Units.
This course focuses on an analysis of the forces shaping community and global health patterns. Drawing on multidisciplinary sources, this course explores the impact of these global processes as they manifest in the health of our own and other societies. Emphasis is placed on analysis of the broad cultural, environmental, social-economic, and political systems that contribute to health status and outcomes, health policies, and health care delivery around the world. Prereq: NURS 310 and NURS 360.

NURS 373. Global Health Practicum. 5 Units.
The purpose of this practicum is to provide students with the opportunity to analyze the concepts of health and health care, health policy and finance, culture and ethics through a preceptored, community-based immersion experience in local, national or international settings. Students will apply epidemiological techniques, the skills of negotiation, partnership building, community assessment and nursing science in the identification and analysis of a health problem leading to the development of an intervention. Counts as SAGES Senior Capstone. Prereq: NURS 315, NURS 316, NURS 338, NURS 339. Coreq: NURS 371 and NURS 372.

NURS 380. Transition to Practice. 8 Units.
This course will prepare students to transition to professional nursing practice by integrating principles of communication, collaboration, and clinical reasoning necessary to provide safe, quality nursing care for patients and their families with complex issues of health and illness. Emphasis will be placed on clinical practice and nursing strategies designed to provide comprehensive, patient-centered care for select populations. Prereq: NURS 315, NURS 316, NURS 338 and NURS 339.

NURS 394. Global Health Seminar. 3 Units.
The focus of this course is the issues and trends in global health from both a nursing and a trans-disciplinary perspective. The course covers how international social, political, economic, environmental, and cultural issues affect health and health care. Particular emphasis is placed on nursing's role in health and wellness across cultures and global societies. Offered as: NURS 394 and NURS 494.

NURS 395. Global Health and Culture in Diverse Populations. 3 Units.
This elective course will use didactic and experiential learning, including travel abroad, to expose students to health care and population health in other countries. The focus of the course will be on issues and trends in global health from a trans-disciplinary perspective. International historical, social, economic, environmental, and cultural issues affecting health and health care will be examined. (Junior or graduate status required). Offered as NURS 395 and NURS 495.
NURS 399. Independent Study. 1 - 12 Units.
Independent guided study for undergraduate students with special interests and/or curricular needs. The course may include didactic, lab and/or clinical experiences. Faculty consent required to register.

NURS 400. Guided Study in Nursing. 1 - 12 Units.
Independent guided study for students with special interests and/or curricular needs. May include didactic, lab, and/or clinical. Separate guided study plan form required. Faculty consent required to register.

NURS 404. Emergent Care of the Child. 2 Units.
This course provides an introduction to the care of the child requiring critical care transport (CCT). This course examines pathophysiology, assessment, diagnostic approaches, and interventions specific to emergent care of infants, children and adolescents by advanced nursing practice in CCT. Prereq: NURS 406.

NURS 405. Inquiry I - Theoretical Foundations. 2 Units.
This course provides an introduction to conceptual and theoretical thinking. Students will examine knowledge development in nursing, conceptual structures, and their uses as a basis for nursing practice and research.

NURS 406. Flight Nursing Seminar I. 1 Unit.
This course introduces the knowledge and skill set for advanced nursing practice in critical care transport. The unique features of delivering care in the critical care transport environment are emphasized.

NURS 407. Critical Care Transport and Advanced Nursing Practice 2. 1 Unit.
This course further develops the knowledge and skill set of advanced nursing practice to deliver care to individuals and groups of patients with critical illness. Emphasis is placed on diagnostic reasoning and patient management in unstructured environments. Prereq: NURS 406.

NURS 412. Practice Change Implementation. 1 Unit.
The course focuses on evidence-based practice implementation and quality improvement methods to facilitate effective management of practice change. Students will define quality and safety problems in the healthcare system in which they work and then implement a change. The course covers issues related to evidence-based practice, teamwork, systems science, change management, and data analytics. Students will apply the concepts to practice through an implementation/quality improvement project.

NURS 415. Introduction to Childbirth. 1 Unit.
This course will provide an overview of the process of physiologic labor and birth and methods to facilitate normal processes and minimize interventions. Anatomical and physiologic factors of labor and birth will be explored in detail. The psychological, social, and cultural influences on labor will be examined. Preparation for childbirth by the woman and her family will be explored. The influences of family and health care providers during the labor and birth process will be analyzed.

NURS 416. Integrated Assessment of the Neonate for Midwives. 1 Unit.
This course will introduce concepts fundamental to the integrated assessment of the neonate. Gestational age assessment and physical assessment skills will be developed. The course will provide the basis for problem identification, decision making, and case management. Coreq: NURS 457.

NURS 420. History of Advanced Practice Nursing. 1 Unit.
This course will provide an overview of the history of advanced practice nursing in the United States. The social, political, and economic factors driving the establishment of advanced practice nursing will be explored. Students will have an opportunity to thoroughly explore the history and evolution of a particular advanced practice nursing role.

NURS 425. Inquiry II - Research Process. 3 Units.
This course emphasizes scholarly inquiry, scientific integrity and scientific investigation. It includes study of the research process, particularly design, sampling, data collection and analysis, and interpretation and reporting of findings. Prereq: NURS 405.

NURS 430. Advanced Pharmacology. 3 Units.
This course focuses on the application of advanced pharmacology and pharmacotherapeutics for common conditions across the lifespan. Principles of pharmacokinetics, pharmacodynamics, and pharmacogenomics are applied. Pharmacotherapeutic decision points congruent with effective prescribing are emphasized, including integrating the ethical, legal and cost-benefits of pharmacological interventions. This course is designed to build on diagnostic reasoning and prior pharmacology study of actions and effects of drugs on the human system. RN licensure and practice recommended. Prereq: Enrolled in MSN, DNP or PhD Nursing program.

NURS 443. Psychosocial and Spiritual Dimensions of Advanced Nursing Practice. 2 Units.
This course will focus on psychosocial and spiritual dimensions of care. Focused interviewing, counseling, and coaching skills will be examined. Skills in assessing spirituality depression, psychological distress, suicide risk, and substance use issues will be addressed.

NURS 444A. Ethical Issues in Advanced Nursing Practice. 1 Unit.
The focus of this course is ethical decision-making for advanced nursing practice. The interaction between the healthcare delivery system and ethical decision making is explored. The role of the nurse in identifying and addressing ethical dilemmas and applying communication strategies in assisting patients and families and the interdisciplinary team is emphasized.

NURS 444B. Health Care Delivery and Finance in Advanced Practice. 1 Unit.
The focus of this course is the study of the financial and business factors related to healthcare delivery and advanced practice nursing. Students will discuss strategies related to business practices, coding, billing, and reimbursement.

NURS 444C. Health Policy Legislation and Legal Issues in Advanced Practice. 1 Unit.
The focus of this course is the critical analysis of health policy and legal issues. Strategies for influencing health policy will be explored.

NURS 451. Leadership for Quality Healthcare within Organizations and Systems. 3 Units.
This course will prepare the student to take a leadership role within organizations and systems to improve the quality of health care. Theory-based strategies to promote change within organizations and systems will be examined. The influence of structural and contextual factors on health, current and emerging information technologies, and communication patterns influencing outcomes of care will be explored.

NURS 453. Advanced Pathophysiology. 4 Units.
This course focuses on the biologic alterations produced by injury or disease among individuals across the lifespan. Physiologic and pathophysiologic concepts that contribute to an individual's capacity for health and susceptibility to illness are examined. Prereq: Enrolled in Master of Science in Nursing Program.
NURS 453A. Advanced Physiology & Pathophysiology I. 2 Units.
This course will focus on physiologic function and pathophysiologic alterations produced by injury or disease among individuals across the lifespan. Physiologic and pathophysiologic concepts that contribute to an individual’s capacity for health and susceptibility to illness will be examined. This will be the first of a two-course series focusing on advanced physiology and pathophysiology. This course will include an examination of cellular and tissue physiology, genetics, immunology, cancer biology, and neurologic systems. (Enrollment in MSN, DNP or PhD in Nursing Program)

NURS 453B. Advanced Physiology & Pathophysiology II. 3 Units.
This course will focus on the physiologic function and pathophysiologic alterations produced by injury or disease among individuals across the lifespan. Physiologic and pathophysiologic concepts that contribute to an individual’s capacity for health and susceptibility to illness will be examined. This will be the second of a two-course series focusing on physiology and pathophysiology. This course will include an examination of cardiovascular, pulmonary, hematologic, endocrine, renal, gastrointestinal, musculoskeletal, and reproductive systems. (Enrollment in MSN, DNP or PhD in Nursing Program)

NURS 454. Well Woman Health Care. 3 Units.
In this course, students will learn to assess and manage common gynecologic and family planning issues encountered by a diverse population of women in ambulatory settings. Culturally appropriate interventions will be integrated throughout. Supervised clinical experiences will focus on achieving the foundation for beginning practice. This will include anticipating and identifying complications and participating in consultations, referrals and collaborative management. The application and synthesis of these principles, theories and concepts will be emphasized in clinical practice. Prereq or Coreq: NURS 453 and NURS 459.

NURS 455. The Childbearing Family. 4 Units.
The focus of this course will be the application of theory, practice and research by advanced practice nurses in the promotion of health and wellness of childbearing women using a family-centered approach. Emphasis will be on normal aspects of pregnancy, focusing on prevention of problems and promotion of health behaviors, as well as identification and management of deviations from normal. Supervised clinical experiences will include understanding normal pregnancy, anticipating and identifying complications, participating in consultations, referrals and collaborative management. Prereq: NURS 454. Coreq: NURS 430.

NURS 457. Labor and Birth. 5 Units.
The art, theory, and the science for nurse-midwifery practice is expanded through research, critical analysis of disseminated research, quality assurance, and other scholarly activities. The focus of this course will be the application of theory, practice and research by advanced practice nurses in the promotion of health and wellness of women, newborns and their families during intrapartum and the immediate postpartum period. Emphasis will be placed on the health-seeking behaviors of the mother and her family using a holistic approach which respects cultural, ethnic, and racial diversity in the provision and evaluation of care. Supervised clinical experiences will focus on achieving the foundation for competent practice as a beginning practitioner. This will include anticipating and identifying complications and participating in consultations, referrals, and collaborative management. Prereq: NURS 559.

NURS 459. Advanced Health Assessment. 3 Units.
This course focuses on advanced assessment of individuals across the lifespan. This course incorporates communication skills, interpretation of data, and diagnostic reasoning. Prereq: Enrolled in Master of Science in Nursing Program.

NURS 464. Global Clinical Learning. 1 Unit.
This course will allow the MSN student to engage in clinical work in low and middle income medically under resourced communities providing direct patient care under clinical supervision of MSN faculty. Students will prepare for the experience by gaining knowledge of the history and culture of the region, common diseases prevalent in the area and orientation to the site operations. The student will focus on the 1) steps to diagnose, treat and implement a plan of care for area specific diseases; 2) culturally and resource appropriate treatments; 3) dental hygiene and nutrition as they impact the health of the local population. Students will prepare culturally appropriate presentations for local nurses and contribute to the preparation of non-medical members of the team for patient safety using current evidence based practices. Offered as NUNP 464 and NURS 464. Prereq: Enrollment in MSN, DNP or PhD in Nursing Program.

NURS 465. Psychopharmacology. 2 Units.
Course content will focus on drug categories commonly used to treat psychiatric disorders and clinical implications for the patient and family. Substance use disorder/Alcohol use disorder and application of detoxification protocols will be described. Pain management and current APRN practice in prescribing will be discussed.

NURS 466. Promoting Health Across Boundaries. 3 Units.
This course examines the concepts of health and boundary spanning and how the synergy of the two can produce new, effective approaches to promoting health. Students will explore and analyze examples of individuals and organizations boundary spanning for health to identify practice features affecting health, compare and contrast practices and approaches, and evaluate features and context that promote or inhibit boundary spanning and promoting health. Offered as MPH 466, PQHS 466, SOCI 466, NURS 466 and BETH 466. Prereq: Graduate student status or instructor consent.

NURS 468. The Continual Improvement of Healthcare: An Interdisciplinary Course. 3 Units.
This course prepares students to be members of interprofessional teams to engage in the continual improvement in health care. The focus is on working together for the benefit of patients and communities to enhance quality and safety. Offered as PQHS 468, MPHP 468, and NURS 468.

NURS 473. Advanced Psychopathology Across the Lifespan: Part I (Infant through Young Adult). 2 Units.
The course will focus on the assessment and diagnosis of psychopathology in children of all ages, infants through young adults. Behavioral deviations from normal growth and development will be assessed while considering age, social, cultural, and economic differences. The responses of family members to psychopathology, violence and substance use in this age group will be discussed.

NURS 474. Advanced Psychopathology Across the Lifespan Part II (Adult and Older Adult). 2 Units.
This course will focus on the assessment and diagnosis of psychopathology in adults and older adults. Behavioral /cognitive deviations from normal growth and development will be evaluated while considering socio-cultural differences and age-appropriate behavior. Responses of family members in relation to adults or older adults’ psychopathology, violence and substance use will be discussed. Prereq: NURS 473.
NURS 475. General Systems Theory: Foundations for Practice. 2 Units.
This foundational seminar will introduce General Systems Theory as a framework for understanding complex entities comprised of component parts that are in constant and mutual interaction. The concepts covered will emphasize the openness and flexibility of a system by attending to its entirety as opposed to focusing on separate parts. The focus will be on the organizational structure and processes controlled through cybernetics that allow system adaptation and transformation. Students will apply General Systems Theory to address the mental health care needs of stigmatized, at risk and vulnerable populations informed by their disciplinary perspectives. Graduate standing in nursing or permission of Instructor.

NURS 476. Advanced Practice Seminar: Role of Psychiatric-Mental Health APRN. 1 Unit.
Students will explore the role of the Psychiatric Mental Health (PMH) Nurse Practitioner and Psychiatric Mental Health Clinical Nurse Specialist within the context of family and community. The course will focus on boundaries, professional development and the scope of practice within these roles. Students will examine ethical, legal, cultural and professional standards as they relate to micro and macro systems. (Admission to Family Systems Psychiatric Mental Health Nursing Program required.)

NURS 481. Family Systems Theoretical Foundations. 2 Units.
This course will focus on the major contemporary theoretical approaches and therapies for conceptualizing and working with families across the lifespan. Attention will be given to families challenged by situations such as stress, trauma, violence, psychiatric disorders, and substance use. Prereq: NURS 453 and NURS 473 and NURS 475 and NURS 476.

NURS 482. Family Systems Integration and Application. 1 Unit.
This practicum experience in the application of family theory will address the professional encounter between the advanced practice registered nurse (APRN) and the family system with attention to health promotion and psychiatric disorder management. Special consideration will be given to policy, legal, cultural, and ethical issues regarding family care and practice. Group supervision of the practicum experience is an expectation. (NOTE: Admission to the Family Systems Psychiatric Mental Health NP major is required.) Prereq: NURS 453 and NURS 473 and NURS 475 and NURS 476. Coreq: NURS 430 and NURS 474 and NURS 481.

NURS 484. Individual and Group Modalities for Family Systems Practice Across the Lifespan. 3 Units.
This seminar will address therapeutic modalities as applied to families across the lifespan. Brief, individual, and group modalities will be studied in the context of Family Systems Theory with a focus on differences in family constellations and developmental stages. The selection of modalities for families will consider the implications of cultural and gender differences, vulnerable populations, and the stigma of psychiatric illness. Prereq: NURS 430 and NURS 481 and NURS 482.

NURS 485. Practicum and Supervision: Family Systems Practice Across the Lifespan. 2 Units.
This practicum experience will involve the professional encounter between the individual, group members, and psychiatric nurse practitioner students within the context of family systems theory. Nursing strategies and concepts from psychiatry, behavioral and social sciences related to the promotion of mental health and biopsychosocial treatment in individual and group members across the life span will be explored. Attention will be given to situations such as stress, loneliness, trauma, violence, and substance abuse. Group supervision of the practicum experience is an expectation. Prereq: NURS 430 and NURS 481 and NURS 482. Coreq: NURS 484.

NURS 486. Modalities for Family Systems Practice: Vulnerable Family Populations. 3 Units.
Students will explore the special needs of families who are currently at risk for or manifesting mental health and substance use disorders within the context of family and community in urban and rural settings. Vulnerable families including those who have been exposed to acute and chronic stress disasters, military-related and other forms of trauma will be studied. The needs of youth and adults who are incarcerated will be addressed. Students will encounter the diverse nature of family relationships, including blended, migrant, and immigrant families; relationships that are defined by choice; and families residing on reservations and in religious enclaves. A variety of treatment modalities will be discussed. Prereq: NURS 482 and NURS 485.

NURS 488. Theoretical Basis of Practicum and Supervision in Consult, Collaborate, and Mental Health Education. 3 Units.
This course will focus on the professional encounter among the psych mental health advanced practice registered nurse (APRN) and patient, families and communities within the context of an environment of care. The nurse consultant e applies general systems and family systems theory to enhance the capacity of patients and families to learn, adapt and develop through mutual interaction and cybernetic processes. The roles of the psychiatric mental health APRN, educator, researcher, administrator and therapist are explored. The theories and processes of consultation, collaboration and adult education are discussed relative to mental health and community education. Prereq: NURS 484 and NURS 485. Coreq: NURS 489.

NURS 489. Practicum and Supervision in the Role of Family Systems Psychiatric Mental Health Advanced Practice. 3 Units.
This practicum course will emphasize the professional encounter between the psychiatric mental health (PMH) advanced practice registered nurse (APRN), families, organizations, communities and agency personnel providing mental health services. Systems variables that influence the learning, adaptation and development of families, organizations and systems will be emphasized. Billing and coding for the PMH APRN will be integrated into the course. The PMH APRN student functions as a change agent in direct and indirect care through the role of practitioner, educator, consultant, planner, evaluator and researcher. Prereq: NURS 484 and NURS 485. Coreq: NURS 488.

NURS 494. Global Health Seminar. 3 Units.
The focus of this course is the issues and trends in global health from both a nursing and a trans-disciplinary perspective. The course covers how international social, political, economic, environmental, and cultural issues affect health and health care. Particular emphasis is placed on nursing's contribution to global health issues and outcomes. Offered as: NURS 394 and NURS 494.

NURS 495. Global Health and Culture in Diverse Populations. 3 Units.
This elective course will use didactic and experiential learning, including travel abroad, to expose students to health care and population health in other countries. The focus of the course will be on issues and trends in global health from a trans-disciplinary perspective. International historical, social, economic, environmental, and cultural issues affecting health and health care will be examined. (Junior or graduate status required). Offered as NURS 395 and NURS 495.

NURS 502. Inquiry III Evidence-Based Practice. 2 Units.
This course will focus on linking research evidence to practice. Processes for appraisal and implementation of evidence-based practice will be included. Prereq: NURS 425 or Requisites Not Met permission.
NURS 503. Inquiry Practicum. 1 - 2 Units.
This course focuses on the development of competencies in scientific inquiry. Such competencies are achieved through participation in a research study or evidence-based project related to nursing science with dissemination of the experience. Prereq or Coreq: NURS 502.

NURS 504. Nursing Knowledge Development. 3 Units.
This course involves two critical issues for knowledge development for the discipline of nursing. First, epistemology is the study of knowledge shared among members of the discipline, the patterns of knowing and knowledge development, and criteria for evaluating knowledge claims and philosophy of science. The epistemological focus is aimed at enabling students to become knowledgeable about approaches to the study of disciplines and scientific knowledge development. Forces affecting the development of knowledge, the origins of key terms and concepts, and identification of major themes in nursing will be examined. Second, the nature of theory and strategies for theory development in nursing will be evaluated. The appraisal and discussion of theory will enable students to apply a variety of strategies and select an approach for beginning theory development that addresses phenomena in their area of interest.

NURS 506. Nursing Epistemology. 3 Units.
This course involves the study of knowledge shared among members of the discipline, the patterns of knowing and knowledge development, and criteria for evaluating knowledge claims and philosophy of science. The course is a search and discussion experience aimed at enabling graduate students to become knowledgeable about approaches to the study of disciplines and scientific knowledge development. Forces affecting the development of knowledge, the origins of key terms and concepts, and identification of major themes in nursing will be explored.

NURS 507. Clinical Knowledge. 3 Units.
This course is structured to allow students to develop clinical knowledge about their area of interest and to begin the process of identifying clinical research questions. Supervision for this experience will be twofold. Students will be placed with an expert clinician with a minimum of a master’s degree (in nursing) to identify and arrange relevant clinical experiences. The student and the clinician will work with the course faculty to create opportunities for the student to experience the clinical phenomena of interest, which may include actual “hands-on” experience. Students will also meet regularly with the other students in the course and the course faculty for group supervision that focuses on linking clinical practice issues to research questions. Course requirements would include eight hours of practicum experiences per week.

NURS 508. Context of Care. 3 Units.
This course is designed to allow students to explore the social, political, economic, and health care issues that form the context for their clinical phenomena of interest. The intent of this course is for the student to become knowledgeable about the broader forces that affect their clinical problem. Topics might include current research in their field, as well as health policy related to their phenomena, political entities that affect funding, and the regulation of practice in their area of interest. The student will need a content expert to help them plan and coordinate their practicum experiences, which should be multiple and varied, and include exposure to both local and state level entities. Prereq: NURS 507 or equivalent.

NURS 510. Health Disparities. 3 Units.
This course aims to provide theoretical and application tools for students from many disciplinary backgrounds to conduct research and develop interventions to reduce health disparities. The course will be situated contextually within the historical record of the United States, reviewing social, political, economic, cultural, legal, and ethical theories related to disparities in general, with a central focus on health disparities. Several frameworks regarding health disparities will be used for investigating and discussing the empirical evidence on disparities among other subgroups (e.g., the poor, women, uninsured, disabled, and non-English speaking populations) will also be included and discussed. Students will be expected to develop a research proposal (observational, clinical, and/or intervention) rooted in their disciplinary background that will incorporate materials from the various perspectives presented throughout the course, with the objective of developing and reinforcing a more comprehensive approach to current practices within their fields. Offered as CRSP 510, PQHS 510, MPHP 510, NURS 510, and SASS 510.

NURS 511. Strategies for Theory Development. 3 Units.
This course examines the nature of theory and strategies for theory development in nursing. Students will explore a variety of strategies and select an approach for beginning theory development that addresses nursing phenomena in their area of interest. Prereq: Admission to PhD nursing program or requisites not met permission.

NURS 518. Qualitative Nursing Research. 3 Units.
This course examines research approaches directed towards the development of nursing knowledge. This course will include methods and issues in data collection, analysis, and critique of research findings. It will focus on the philosophical and epistemological foundations of qualitative research, present an overview of various methodological approaches, examine the criteria for rigor, and analyze ethical issues in qualitative methodologies. Prereq: Admission to PhD nursing program or requisites not met permission.

NURS 523. Advanced Practice Nursing in Critical Care Transport Practicum. 1 - 5 Units.
This practicum is designed to promote safe, effective care in critical care transport (CCT) by advanced practice (APN) nurses and APN nursing students. Experiential learning is individualized with a focus on the assessment and management of patients with life-threatening or time sensitive conditions. Precepted experiences address the knowledge, skills and attitudes for optimal CCT across the lifespan. Students will be required to have eligibility or certification in AGACNP or equivalent.

NURS 524. Molecular Genetics for the Nurse Scientist. 3 Units.
This Ph.D. course provides an in-depth forum for discussion of fundamental principles regarding molecular genetics and its relevance to medical genetics, genomics and nursing. The course will cover principles of molecular genetics including an overall discussion of the complexity of the human genome, the structure, function and regulations of genes (DNA, RNA, proteins), genetic variation, inheritance patterns and a brief overview of molecular laboratory techniques used in clinically based research. In addition the course will discuss genetic-based research approaches, and ethical challenges that accompany human genetics research. Admission to PhD nursing program required.
NURS 530. Advanced Nursing Research Methods I. 3 Units.
This course focuses on conceptualization of a research problem within a nursing perspective, systematic literature review of a substantive area of research, and the design component of a research study to address scientific gaps. Descriptive, quasi-experimental, experimental, and mixed methods designs will be examined. Threats to internal and external validity will be discussed. The emphasis is on the application of design strategies while encouraging flexibility in conceptualizing a study using different research methods. Coreq: NURS 532 or requisites not met permission.

NURS 531. Advanced Nursing Research Methods II. 3 Units.
This course focuses on sampling, measurement, instrumentation, data management, intervention development, and human subjects' issues. These will be discussed and applied within the context of a scientific study in a substantive area that is consistent with theoretical and empirical knowledge and the nursing perspective. Prereq: NURS 530 and NURS 532 or consent of instructor.

NURS 532. Applied Statistics. 3 Units.
This course provides an advanced overview of the assumptions and applications necessary to analyze and interpret questions and research related to clinical practice. Emphasis will be on statistical interpretation of research. During the course, data management, statistical analysis, and data interpretation, as well as univariate, bivariate, and multivariate statistics such as ANOVA and ANCOVA will be examined. The data analysis process will be examined and deconstructed throughout the course. Offered as NUND 450 and NURS 532. Prereq: Admission to PhD nursing program or requisites not met permission.

NURS 533. Introduction to Data Science in Healthcare. 3 Units.
This course introduces students to key concepts in data science with a focus on applications in healthcare delivery and clinical research. The course will discuss common sources of structured and unstructured clinical healthcare data, and the theory and application of different methodologies including machine learning and artificial intelligence. Students will be introduced to the tools and processes used to clean data, perform analysis, and visualize data through experiential learning. The integration of data science research into clinical practice at the population level (e.g. disease surveillance), system level (e.g. learning health systems) and patient-level (e.g. precision health) will also be discussed. Prereq: NURS 530 and NURS 532.

NURS 553. Cultural Diversity Topics. 1 Unit.
This course will explore topics around cultural diversity in advanced nursing practice. Concepts related to cultural sensitivity in delivery of healthcare will be integrated.

NURS 557. Advanced Midwifery. 6 Units.
In consultation with faculty, students select a nurse-midwifery service where they will assume the responsibilities of beginning practitioner for a minimum of 10 weeks of intensive supervised clinical practice. Students will synthesize the nurse-midwifery management process while providing continuity of care and integrating all core competency areas. Students will explore the professional aspects of nurse-midwifery practice. Historical development of the profession will be emphasized as a framework for understanding current issues related to nurse-midwifery education and practice in the United States. Prereq: NURS 457.

NURS 559. Primary Care in Women's Health. 4 Units.
In this course, students will gain knowledge needed to assess and manage primary health care problems commonly encountered by diverse populations of women in ambulatory settings. This course will prepare the student to use the problem-solving approach to assist individuals with common acute and chronic health problems. Culturally appropriate health promotion and disease prevention will be integrated throughout. The synthesis and application of these principles, theories and concepts will be emphasized in clinical practicum. Prereq: NURS 454 and NURS 455.

NURS 601. Special Problems. 1 - 12 Units.
This course is offered, with permission, to Ph.D. students in Nursing undertaking reading in a field of special interest.

NURS 609. Health Care Policy and Planning. 3 Units.
The primary focus of this course is to explore the leadership role of nurses in health policy development and implementation as well as the role of research in health care policy formation and planning. Special emphasis is placed on selected national and international health policy issues that form the socio-political and economic context of nursing care and practice. Ethical dimensions of public policy formulations and implementation are highlighted. Offered as NUND 508 and NURS 609.

NURS 615. Topical Seminar in Health Science Research. 3 Units.
This PhD course is designed to provide an in-depth knowledge of research issues in a given area. Opportunities are provided to apply knowledge for further development of the student’s research interests and ideas. An in-depth examination of selected theoretical and methodological approaches to the development of research related to human science will be emphasized. Interrelationships among theory, research, and knowledge from nursing and related disciplines will be explored. Prereq: Admission to PhD nursing program or Requisites Not Met permission.

NURS 630. Advanced Statistics: Linear Models. 3 Units.
This course is focused on advanced procedures for data analysis and statistical inference in health research. The course is devoted to discussion and application of linear models, including simple and multiple regression and logistic regression to study design. The role of assumptions and theory in guiding the analysis plan is emphasized through lecture, readings, and critical evaluation of published research in the student’s area of interest. Prereq: NURS 532 or Requisites Not Met permission.

NURS 631. Advanced Statistics: Multivariate Analysis. 3 Units.
This course focuses on selected advanced multivariate topics and procedures in health research. Topics will be covered through lecture, readings, computer analysis as well as critical analysis of published research in the health sciences fields. Topics to be covered in this course include: survival analysis, factor analysis, path analysis, repeated measures ANOVA and advanced regression techniques (logistic, loglinear, mixed models). Prereq: NURS 630 or Requisites Not Met permission.

NURS 632. Advanced Statistics: Structural Equation Modeling. 3 Units.
This course focuses on advanced data analytic procedures using structural equation modeling (SEM) in health research. Content will be explored through lecture, computer analysis, and critical analysis of relevant research. Topics covered in this course include: SEM with latent variables, path analysis adjusting for measurement error, nested models, and advanced SEM techniques, e.g., exploratory SEM, autoregressive models, latent growth curves, and latent class analysis using mixture modeling. Prereq: NURS 630 or Instructor Consent.
NURS 671. Proposal Development. 1 - 6 Units.
Provides an opportunity for guided development of a candidacy proposal through planned contact with a designated committee of faculty members. The aim is to assist the student in the development of a refined proposal with strong scientific merit. The course should be utilized only by those with a candidacy proposal statement. Minimum 3 hours required for progression in program.

NURS 701. Dissertation Ph.D. 1 - 9 Units.
(Credit as arranged.) Prereq: Predoctoral research consent or advanced to Ph.D. candidacy milestone.
